DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to fluid filter assembly, classified in class 210, subclass 437.
 - II. Claims 16-21, drawn to method of manufacturing fluid filter assembly, classified in class 210, subclass 493.1.

2. The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a different process such as adhesively securing the gasket and securing the filter media by molding.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1723

4. A telephone call was made to William Gottschalk on March 8, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
